

2018-2019 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 15, Apr. 7th, 2019– Apr. 13th, 2019)

Highlights

- In week 15 of 2019, all of the individual local flu activity indicator trend values decreased compared to the previous week. As a whole, flu intensity (composite indicator) decreased and is Low.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = WIDESPREAD, LOW
- Local medical facility labs reported 1,585 tests run with 134 (8.5%) positive results for week 15 of 2019.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms decreased compared to last week.
- In week 15 of 2019, trends for the local over-the-counter medication category sales tracked were mixed (decrease in cough and cold, thermometer, chest rub, adult anti-fever, and throat lozenge sales; increase in pediatric anti-fever sales; stable electrolyte sales) compared to last week.
- In the U.S., influenza activity decreased but remains elevated in the United States. Influenza A(H1N1)pdm09 viruses predominated from October to mid-February, and influenza A(H3N2) viruses have been more commonly identified since late February. Small numbers of influenza B viruses have also been reported. Please [visit the CDC website for specific information](#).

Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "•" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Ohio (statewide) athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 15, the preliminary Ohio¹ (statewide) influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (9.9 per 1,000 visits) decreased compared to the previous week and is above its baseline average for the week (Figure 1). The week 15 percentage of all Emergency Department (ED) visits categorized as ILI decreased compared to the previous week (Figure 3) and is approaching its historic baseline for the week.

Nationally, during week 15 of 2019, 2.4% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.2% for week fifteen.

Laboratory Surveillance

During week 15 of 2019, reporting Franklin County sentinel medical facility laboratories tested 1,585 specimens, with 134 (8.5%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2018 through week 15 of 2019 is 58,436 with 9,510 (16.3%) positives (9,171 type A, 337 type B, 0 type A and B, 2 type unknown).

Nationally in week 15 of 2019, clinical laboratories reported 22,526 specimens tested for influenza viruses, 2,669 (11.8%) of which were positive (2,266 type A, 403 type B). Public health laboratories reported testing 831 specimens, 353 of which were positive (321 type A – of which 77 were A(H1N1)pdm09, 236 were H3N2, and 8 were not subtyped; 32 type B – of which 3 were Yamagata lineage, 17 were Victoria lineage, and 12 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 15 of 2019, Ohio clinical labs reported 71,397 specimens tested for influenza this season thus far. Positive results include: (427) A(H1N1)pdm09; (546) A/H3N2; (11,826) Flu A Not Subtyped, and (254) Flu B (through 4/13/2019). In week 15 of 2019, ODH Public Health Lab reported 1,280 positive influenza tests from specimens sent by various submitters this season so far. Positive results include: (656) A(H1N1)pdm09; (617) A/H3N2; (7) Influenza B (through 4/13/2019). Please visit the ODH website for more information.

ED Respiratory Visits

In the 15th week of 2019, the percentage of all ED visits categorized as respiratory decreased compared to the percentage seen the previous week and is similar to its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 15 of 2019, trends for the local over-the-counter medication category sales tracked were mixed (decrease in cough and cold, thermometer, chest rub, adult anti-fever, and throat lozenge sales; increase in pediatric anti-fever sales; stable electrolyte sales) compared to last week.
